

DD/S-56-2454

Mr. Edward R. Carr, President  
Washington Board of Trade  
1616 K Street, N. W.  
Washington 6, D. C.

Dear Mr. Carr:

Your letter addressed to the Commissioner of Public Buildings, December 13, 1955, regarding the Washington Board of Trade resolution that any extra expenses for improvements to roads, bridges and utilities necessary in connection with the proposed Central Intelligence Agency headquarters building should be borne by the United States, was referred to me for consideration under a transmittal letter from Mr. Fred S. Poorman dated January 20, 1956.

As you know, we have received the final report of the National Capital Planning Commission approving our use of a portion of the Bureau of Public Roads property at Langley, Virginia, as the site for our new headquarters building. We have decided, therefore, to proceed with our plans for the development of that property.

We appreciate the interest of the Board of Trade in this matter and will give full consideration to your views as we proceed with our planning.

Sincerely,

L. K. White  
Deputy Director
